Zerion and phocas Partner on Business Intelligence Solutions

(ORLANDO, FL) February 19, 2009 - Zerion saw an opportunity to improve business intelligence amongst one of Zerion's target markets – wholesale distributors – and have partnered with phocas to provide an analytics solution to these clients.

“Zerion has been servicing Eclipse software users with business management consulting and training since 2005,” said Tony King, vice president and partner at Zerion Group. “Partnering with phocas was an easy decision when we learned about their experience with Eclipse and ability to provide users with better reporting and analysis.”

Zerion and phocas are responding to a growing need among wholesale distributors to have stronger business intelligence, particularly during slow economic times. The partnership will provide distributors with a software solution that expands their reporting capabilities and enables them to further analyze sales, inventory and financials with a user-friendly interface. Together, Zerion and phocas will help their clients clearly understand their performance so that they can gain efficiencies and make smarter decisions.

With offices in Orlando and Tampa, Florida, Zerion has team members throughout the United States. The firm is an authorized SAP channel partner for SAP Business One and has hundreds of years of combined experience in a variety of software packages across a diverse set of industries, with a particular focus on distribution. The team logs thousands of consulting and training hours each month and has implemented software in nearly 500 locations.
